

Unified Field Theory by Tim Joseph, Cornell University

In the beginning there was Aristotle,
And objects at rest remain at rest,
And objects in motion tended to come to rest,
And soon everything was at rest,
And God saw that it was boring.

Then God created Newton,
And objects at rest tended to remain at rest,
But objects in motion tended to remain in motion,
And energy was conserved and momentum
was conserved and matter was conserved,
And God saw that it was conservative.

The God created Einstein,
And everything was relative,
And fast things become short,
And straight things become curved,
And the universe was filled with inertial frames,
And God saw that it was relatively general,
but some of it was especially relative.

Then God created Bohr,
And there was the principle,
And the principle was quantum,
And all things were quantified,
But some thing were still relative,
And God saw that it was confusing.

The God was going to create Fergeson,
And Fergeson would have unified,
And he would have fielded a theory,
And all would have been one,
But it was the seventh day,
And God rested,
And objects at rest tend to remain at rest.
